

FEMA

Mitigation Planning Toolkit

Hazard Mitigation Planning

FEMA Region IV has developed an extensive web based tool to assist States, Local, and Tribal Communities involved in Hazard Mitigation Plan Development and Updates. The subject matter and various topics contained on this tool will aid planners, community officials, and leaders understand the necessity for having Hazard Mitigation Plans while guiding the direction of plan development and required updates. The tool has been designed to follow preferred planning methodology allowing planners to go step-by-step throughout the planning process or allow for specific sections only of the plan to be selected for review and/or update.

Notice: Web links are subject to change without notice or warning.
